

STRONG AROUND THE WORLD

SMALL PROJECTION PORT SMALL VIEW PORT

F E A T U R E S

- Small size is convenient for use as a media Projection port or Small View port.
- Optional extender sleeve to accommodate up to 18 inch (45.7cm) thick walls.
- U.V. and chemical resistant synthetic rubber gasket at all glass to metal contact points forms a positive seal reducing booth noise entering the auditorium.
- Includes 1/4 inch (6.35mm) Starphire® glass.
- Small View port can be upgraded to a Small Projection port with the addition of a Small Projector Shelf kit available from Strong. This matching steel shelf has adjustments for incline and height.
- All models are made of heavy gauge steel with a durable satin black powder coat finish.
- Small Projection port and Small View ports have easily removed brass window hardware for trouble free maintenance and cleaning without the need for tools. Inner window frame has ergonomic aluminum handles for safe glass removal and installation.
- Unit comes fully assembled and ready to install. *

* Projector Shelf Kit requires minor assembly

Small Projection port
(includes Projector Shelf)

Overview:

Strong's Small View port easily converts to a Small Projection port with addition of a Small Projector Shelf kit. Good for viewing auditorium or as a projection port for smaller venues. This port is approximately half the width of our Medium Projection / View port and Medium View ports.

Options:

The Small Projector Shelf provides a secure, adjustable platform for media projection equipment. This shelf is included with the Small Projection port, or can be ordered as a kit to upgrade your Small View port.

Glass:

Strong's Small Projection port and Small View ports feature high quality glass throughout. Our standard glass is 1/4 in (6.35 mm) Starphire® non-coated. This glass offers significant cost savings over a coated glass, yet retains excellent light and color transmission properties. Our premium glass is Clearview Plus™ coated glass which has a double sided anti-reflective coating for superior light and color transmission.

Custom Ports:

Strong can custom manufacture your port with either non-coated Starphire® glass or Clearview Plus™ coated glass to suit your need. Custom projection port sizes are available provided minimum quantities are met, contact your sales representative for details.
